Folder Shortcut

1, How to install
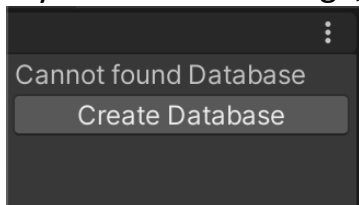

All you need to do is import the package

Note: Please put the package in Assets folder

2, Open Folder Shortcut window

You can open it in the menu: Tools/ZeroX/Editor/Folder Shortcut

3, Create Database

If you see this message, please press "Create Database" button to start using.

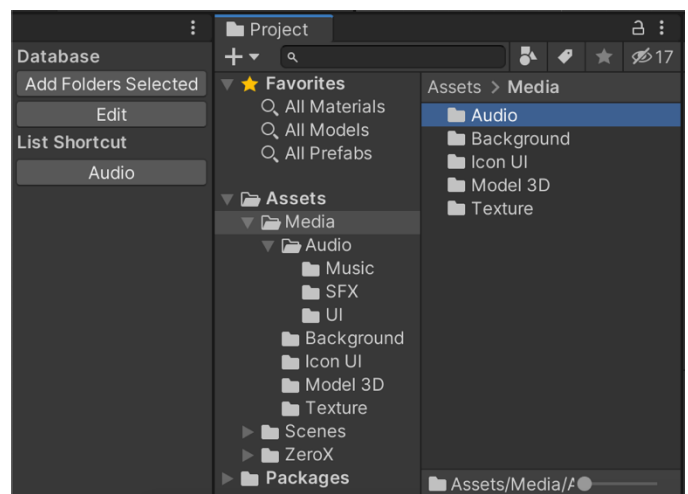

4, How to add shortcut

You just need to select one or more folders in the Project window and click the Add Folder Selecter button.

Note: Detect only the selected folders in the right column of the project window

5, How to use

You just need to click on the added shortcuts in the shortcut list

Edit Mode

1, Switch to edit mode
Click the edit button to switch to edit mode.
This mode provides functions so you can edit your shortcuts.
After editing is complete, click save button to save the database and exit edit mode.

2, Sort
Click the arrow buttons to move the shortcut up and down

3, Rename shortcut
This only rename shortcut, not folder name.

4, Remove
Click the "-" button to remove shortcut from list

4, Change Button Color
Change the button color so you can easily recognize the shortcut you want.
Note: To set it to default color, just change the color to RGBA value (0, 0, 0, 255)

If you want to set the color black, you can use an RGBA value close to (0, 0, 0, 255) like (1, 0, 0, 255)
